introduction

This project focuses on traffic analysis of a fashion website 'Kurtify' using Google Analytics. The objective is to understand user behavior, traffic sources, and website performance.

Website Overview

The Kurtify website is designed to showcase and sell kurtis. The screenshots include homepage and product pages.

Google Analytics Overview

Google Analytics is used to track user activity and performance metrics.

The website received around 70 users, indicating initial traffic generation.

Audience Insights

Analysis of audience demographics helps understand user behavior.

Most users accessed via mobile devices, indicating mobile optimization importance

Demographic details: ... Last 28 days May 8 - Jun 4, 2026

Legend: Total, Chennai, Salem, Coimbatore, Bengaluru, Cuddalore

Improvements & Recommendations

- Improve SEO to increase organic traffic
- Run Instagram ads for brand awareness
- Optimize mobile user experience
- Improve product descriptions and images
- Add offers and discounts

The screenshot displays a mobile analytics dashboard titled "Pages and screens: Pag...". It shows data for the last 28 days, from May 8 to June. The dashboard includes a legend for different page types: Total (blue circle), /view/kurtify/home (blue circle), /view/kurtify/collections (green square), /view/kurtify/our-story (orange diamond), and /search/kurtify (purple triangle). Below the legend, there is a table with columns for "Page path and screen class", "Views", and "Active users". The table lists four items: Total, /view/kurtify/home, /view/kurtify/collections, /view/kurtify/our-story, and /search/kurtify. Each item has a checkbox, a rank, and a percentage of total views and active users.

	Page path and screen class	Views	Active users
☒	Total	154 100% of total	74 100% of total
☒	1 /view/kurtify/home	128 (83.12%)	73 (98.65%)
☒	2 /view/kurtify/collections	15 (9.74%)	6 (8.11%)
☒	3 /view/kurtify/our-story	10 (6.49%)	6 (8.11%)
☒	4 /search/kurtify	1 (0.65%)	1 (1.35%)

Conclusion

The project demonstrates basic traffic analysis using Google Analytics and provides insights into improving website performance.
